

Sign up for *SolarGMP* and metering reimbursement!

Please fill out this form to participate in *SolarGMP* and to receive your metering cost reimbursement. Provide us with copies of your expenses that were related to setting up the metering (including electrician costs, meter socket, wiring, etc.) and GMP will reimburse you up to \$300 to help you offset these expenses. *(Note: SolarGMP has been approved, but Green Mountain Power is seeking Public Service Board approval of the metering reimbursement in a separate proceeding. You may send copies of your expenses, and if the reimbursement plan is approved, we will send your reimbursement.)*

In order that we may enroll you in this program we will need to make an on-site inspection of your solar setup as well as to install the new GMP meter. Give us a call at 888-835-4672 so that we may set up a time that works for you. *SolarGMP* will go into effect as soon as we set the meter and your additional benefits will first appear on your next bill.

Thank you for your interest and involvement in *SolarGMP*. Together we can help increase the amount of solar energy in Vermont!
